Fast ForWord
reading assistant

A young girl with long dark hair and a pink flower in her hair is smiling. She is wearing a pink shirt and a black backpack. The background is black with the text 'BUILD ENGLISH FAST™' in green and white. Below the text is the 'Fast ForWord' logo, which includes a small blue cube icon with an orange dot on top, followed by the text 'Fast ForWord' in orange and 'reading assistant' in white.

Academic English takes 7+ years to learn.
Your students don't have that kind of time.

Two young girls are smiling and laughing outdoors. The girl in the foreground is wearing a blue and white patterned top. The background shows a street with a lamppost and a cloudy sky.

The Facts

- **Highest rated program** for English Language Learning on WWC
- 3+ million participants
- 80+ patents issued (most recent in 2014)
- Evidence-based research at leading universities
- 300+ outcomes studies
- Used in over 50 countries

1 Prepare the Brain to Hear English

Through English sound training exercises, students' brains become "wired" to hear and quickly process the phonemes of English.

Foundational English Language Skills Developed

Auditory Sequencing	Phonological Accuracy	Word Analysis
Auditory Word Recognition	Phonological Memory	Listening Comprehension
English Language Conventions	Working Memory	Vocabulary
Following Directions	Advanced Listening Accuracy	Phonological Fluency
		Sustained Attention

1 Prepare the Brain to Hear English

- Each language has a unique “keyboard”
- A child raised with English records a keyboard of the 44 speech sounds or phonemes of English.
- A child raised with Czech language has 39 phonemes.
- Learning a second language requires the brain to build new “keys” – clusters or sets of neurons -- to access the new language accurately and quickly.

1 Prepare the Brain to Hear English

- Using the principles of brain plasticity, *Build English Fast™* exercises build and tune the inner keyboard for English.
- Perceiving and sounding out English words becomes easy and automatic.
- The exercises that build the English keyboards for ELL students also correct mushy keyboards in the brains of struggling readers.

Adaptivity

e.g., Phonemic Mapping in the Brain

Struggling Reader/English Language Learner

Adaptive Modified Speech

Late – Natural Speech

2 Intensively Practice English Skills

Provides intense and personalized adaptive practice in English grammar, vocabulary, reading and listening comprehension which develops automaticity.
