

# Kid's Box

## New Generation

The classic course for  
a new generation

## Why choose Kid's Box New Generation?

1

### CHARACTERS THAT MIRROR SOCIAL DEVELOPMENT

The toys, Star family and friends lead pupils through their learning journey. Characters grow and develop with young learners, mirroring natural social connections and interests. At the beginning the children are very attached to their toys, but by the end, they have their own blog!

2

### A DIGITAL DIMENSION IN CLASS AND AT HOME

The toys in the toy box may come alive when nobody's looking, but the whole course comes to life before your class' eyes. Each unit comes with up to five videos, including stories, songs, documentaries, drama, grammar and phonics. With the digital support for both teachers and learners in Cambridge One, classes can enjoy lots of interactivity and pupils can share their learning with their families at home.

3

### DEVELOPMENT OF THINKING AND SOCIAL SKILLS

While learning about the world through different subjects such as geography, science, maths, sport and art, pupils are working on the skills they need to thrive in it. Activities help them think critically and creatively, develop values, work collaboratively and communicate with confidence. Look out for the Cambridge Life Competencies icon at the bottom of pages.

4

### PHONICS PRACTICE BUILT INTO LESSONS

Encouraging children to speak is a key focus. In early levels, pupils practise sounds and letter formations with Monty the mouse. Later on, Lock the detective takes over the ongoing phonics investigation! These dedicated sounds and spelling sections integrate phonics into your lessons, making speaking a natural part of exploring English.

5

### EXAM PREPARATION WOVEN THROUGH THE COURSE

The syllabus follows the Cambridge English Qualifications for Young Learners syllabus, which works towards a celebration of learning for every pupil. Exam preparation is gently woven into each level, familiarising pupils with exam scenarios in a natural way. New exam folders at the end of the Pupil's Books provide the option of a stronger focus on exam preparation.

6

### FUN AND LAUGHTER FOR EVERYONE

Ultimately, teaching and learning should be enjoyable. Stories of toys that have personalities of their own, hapless detectives and an archaeologist's exploration of the ancient world bring fun, laughter and discovery to the experience. There's just something about Trevor's tendency to eat pencils that makes you smile...
